

Team report.

Names:

- 1) Rishi Malani
- 2) Anand Kulkarni
- 3) Prashant Kadam

- a. Your meetings (describe when each meeting occurred and what was discussed for the project at the meeting?)

Meeting	Date	Summary
Meeting 1	11/25/16	Spited work on all procedures,
Meeting 2	11/30/16	Status of what is already covered and next plan
Meeting 3	12/1/16	Combine proc in a package and test with package
Meeting 4	12/3/16	UI and Server side code
Meeting 5	12/5/16	Testing, Documentation

- b. What was your plan (schedule) for completing your project? How was the plan followed during completing the project?

As described above we spitted procedures between three of us and followed timeline to complete and test each procedure thoroughly by each Team members

- c. Which team member is primarily responsible for which part of the project? Did the other member contribute to the task primarily assigned to the other member?

Most of the work done together once all procedures were ready. There is equal contribution from all team members

Primary responsibility

Rishi & Prashant	UI and DB interaction, Testing
Prashant & Rishi	Package Testing as a whole
Anand & Rishi	Server side framework, Documentation, and Testing with UI
Anand Prashant Rishi	End to end Testing

d. What is the experience for each of you working as a team? What are the lessons (both positive and negative) learned?

- It was awesome experience to work in a team of three.

Lesson learned

- Time management
- Dividing work in a team
- Helping another team member where he is stuck with some task
- Catching bugs and though testing solution in a team is always effective
